

Operation for MD385 Autocutter

Open the support of reels. Switch on the device. Place one or several reels on the rack one by one from the left 0 point to the right. Let paper up and film down and the reel comes out at horizontal position to get best cutting effect. Then feed the reel in between the rubber rollers. Click **REW** or **FWD** to adjust the reel into a proper position. Click LCD to set, select **Cut Length**, **Cut Amount** and **Width**. Press **START/STOP** to start. The device will remind of you the current condition on **Working Status** and with sounds later.

MD385 自动封口机操作流程

打开卷料支架，接上电源开关见LCD显亮，放置单卷或多卷封口袋，卷料左边对准“0”位，塑膜朝下纸朝上和水平出料，以获得最好的切割效果。将卷料端平整插入两条凹凸橡胶滚轮之间，点击**进纸**和**退纸**调整卷料至恰当的位置，然后点击LCD设置，并选择**切割长度**、**切割数量**、**切割宽度**，点击**启动/停止**开始工作。工作状态栏和声响报警会提醒你实时机器状态。

Open the upper cover to replace the knife
打开上盖换刀片

Cut several reels at the same time
同时切割多卷卷料
